

MASTER YOUR DIGITAL SKILLS

Mastering Scholar GPT for
Research Excellence

Artificial Intelligence (AI)

JOIST Innovation Park

Co-funded by
the European Union

COURSE OVERVIEW

1. Learn to search, summarize, and critique academic papers while identifying research gaps and emerging trends.
2. Master the art of structuring research papers, crafting impactful abstracts, and maintaining a polished, scholarly tone.
3. Generate citations, manage references, automate bibliographies, and avoid plagiarism.
4. Develop compelling proposals that align with funding priorities and are tailored to secure grants and project support.

TARGET AUDIENCE

This course is designed for researchers, academics, graduate students, and professionals involved in scholarly writing or research. It is ideal for anyone seeking to streamline their academic processes, enhance their writing quality, and improve proposal and project development using Scholar GPT.

COURSE DESCRIPTION

This course offers a comprehensive exploration of Scholar GPT, a cutting-edge AI tool tailored for academic research and writing. Participants will learn how to leverage its capabilities for efficient literature reviews, precise citation management, and seamless academic paper drafting. The course also delves into advanced techniques for identifying research gaps, improving writing quality, and crafting impactful proposals. With a structured curriculum spanning Scholar GPT's features and applications, this course is designed to enhance scholarly productivity and refine academic communication.

- Introduction to Scholar GPT: Overview, applications, and setup for academic research.
- Literature Reviews: Efficient searching, summarizing, and identifying research gaps.
- Academic Writing: Structuring outlines, drafting papers, and enhancing clarity and tone.
- Citation Management: Automating citations, bibliographies, and integrating tools.
- Proposal Writing: Creating impactful proposals with work plans and sustainability strategies.
