

MASTER YOUR DIGITAL SKILLS

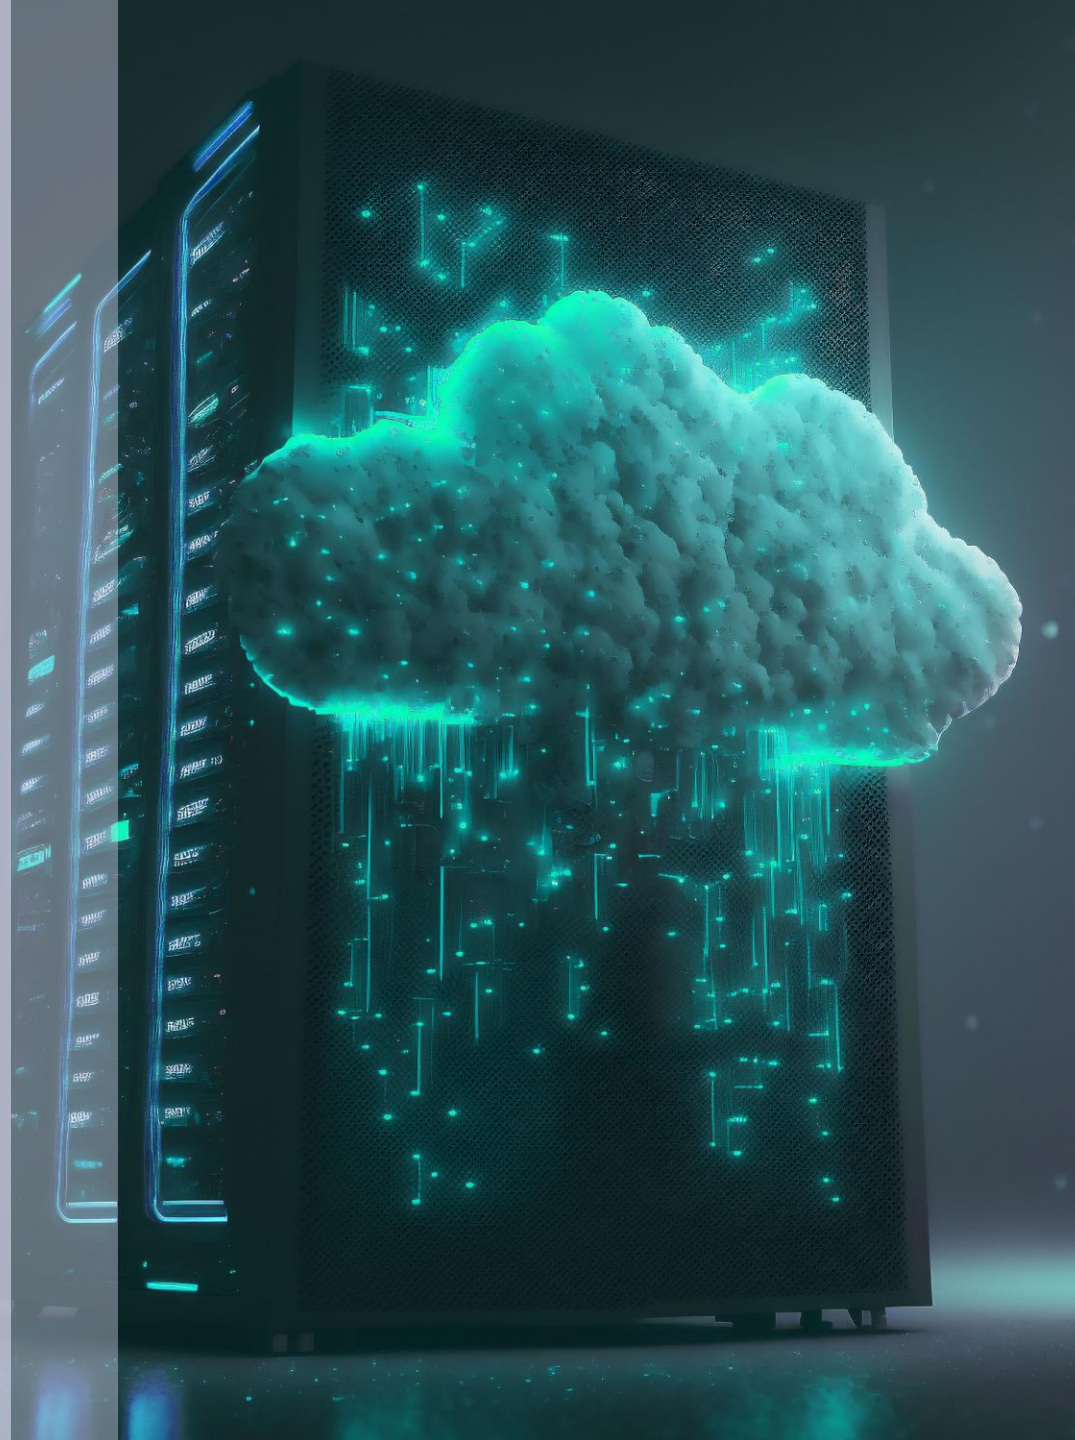

*SMB cybersecurity -
What should I do if my
business is attacked?*

Cybersecurity

Robocoast

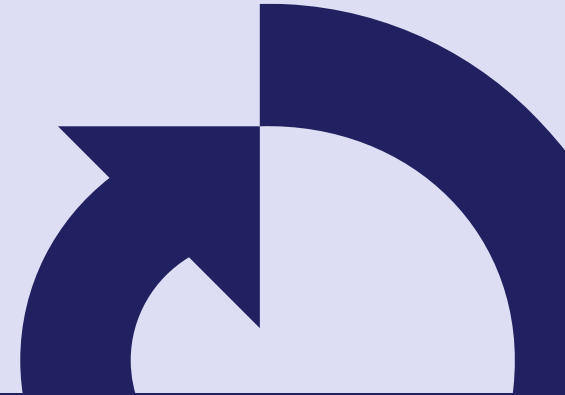

Co-funded by
the European Union

COURSE OVERVIEW

- Access to easy, yet high-impact cybersecurity tips.
- Perspective on how to prioritize correctly, instead of technology challenges, an SME can focus more on what is essential – its business.
- The latest practical tools and examples selected and presented by a professional.

TARGET AUDIENCE

You know what to do when your business is attacked and how to prepare for it.

The web is full of scammers and hackers, which is why it is important to protect yourself in advance against various attacks.

COURSE DESCRIPTION

During the webinar, you will be able to do exercises with the guidance of a trainer, where you can check whether the link or attachment you receive is safe or a scam.

- Provide participants with an up-to-date overview of the current state of cyberattacks and the challenges of the near future.
- Helps participants understand what to consider and where to start cyber preparedness from an SME perspective.
- Provide practical and easy instructions on what to do after a successful cyberattack.
- See professional examples of small and easy practical actions to improve your own or your company's cyber security.
