

# MASTER YOUR DIGITAL SKILLS

---

## Quickstart Tutorial – Data Visualization with Power BI

---

Data Analytics, data literacy & data driven decisions

*StackFuel*

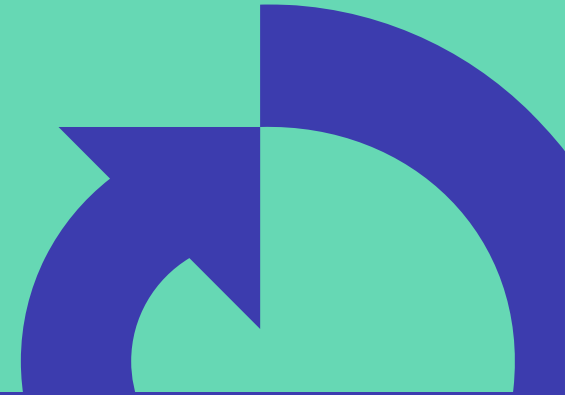

Co-funded by  
the European Union

# COURSE OVERVIEW

We demonstrate how to use Power BI for effective data visualization and analysis. We walk through the process of creating a dashboard and a report, showcasing different visual elements like infoboxes, bar charts, pie charts, and KPI visuals. We explain the distinction between dashboards and reports within Power BI and introduces tools like the Power Query Editor and DAX language for data management and analysis.

## OUR GOALS

1. Equip Learners with Data Analytics Skills.
2. Drive the digital transformation for your company.
3. Cultivate life long learning.

# COURSE DESCRIPTION

This tutorial, offers a comprehensive introduction to Microsoft Power BI, a leading tool for self-service business intelligence. The video, lasting about 20-30 minutes, is designed for beginners who want to learn how to create dashboards and reports without extensive technical skills

- **Creation of Dashboards and Reports.**
- **Use of Power BI Web and Desktop Applications**
- **Data Preprocessing with Power Query Editor**
- **Interactive Visuals and Drill-Down Capabilities**
