MASTER YOUR DIGITAL SKILLS

Structured Data

Data Analytics, data literacy & data driven decisions
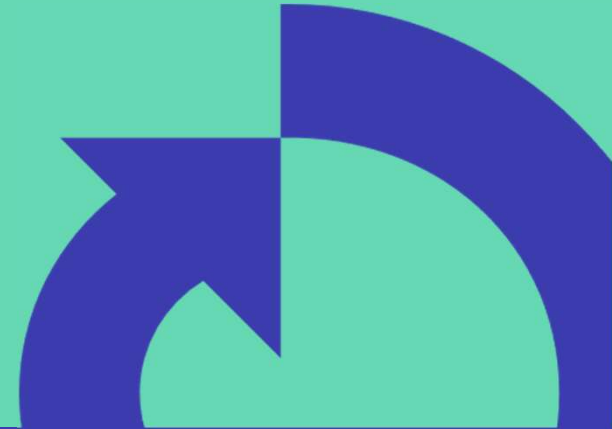

StackFuel GmbH

Co-funded by
the European Union

COURSE OVERVIEW

Structured data is the most accessible type of data. Whether you use data warehouses or Excel spreadsheets, these are examples of structured data.

Structured data also needs to be carefully collected and maintained to ensure high data quality. In this course you will learn some simple rules of thumb to help you manage your data.

OUR GOALS

1. Equip Learners with Practical Data Management Skills.

2. Drive the digital transformation for your company.

3. Cultivate life long learning.

COURSE DESCRIPTION

The course Structured Data provides you with simple guidelines for working with tables and structured data sets. You will apply them on small datasets to get a feeling for the process of data cleaning.

This course is available in English and German.

Main Topics:

- **9 Rules of thumb for working with structured data**

- **Examples and excercises**

- **Data cleaning in a small, real-life inspired scenario**
