

MASTER YOUR DIGITAL SKILLS

Introduction to Tensorflow

Cloud & Software / Programming

Workearly

Co-funded by
the European Union

COURSE OVERVIEW

Explore the fundamentals of machine learning through TensorFlow, one of the most powerful AI frameworks. Learn how to build, train, and evaluate neural networks to understand how modern AI systems work.

OUR GOALS

1. Understand what TensorFlow is and its role in machine learning.
2. Learn the basics of building and training models.
3. Explore neural networks and their real-world applications.
4. Gain confidence in running simple ML experiments.

COURSE DESCRIPTION

Dive into the world of machine learning with TensorFlow. Learn the fundamentals of building and training neural networks to solve real-world AI challenges and power intelligent applications.

- **Overview of TensorFlow framework**
- **Building your first ML model**
- **Neural network basics**
- **Training and evaluation workflows**
- **Introduction to datasets and tensors**

COURSE INFO

Location	<u>Workearly Platform</u>
Date	Asynchronous
Duration	2 hours
Cost	Participation is fully funded by the European Union, under the Level Up Project
